EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with MR. Repper on 02/02/2006.

The application has been amended as follows:

Claim 62 has been amended as follows:

62. (Currently Amended) A method for testing an object of value, [characterized in that it is checked] comprising the step of checking whether a color shift effect is present, and whether upon a change of temperature both a thermochromic effect and a polarization effect not existing before the change of temperature are present.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance:

Art Unit: 2872

Claims 1-61 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the first material being crystalline which does not polarize at the first temperature, but changes its color and polarizes upon a change of temperature and change to the liquid-crystalline state as set forth in each independent claim.

Claims 62-63 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the step of checking whether a color shift effect being present, and whether upon a change of temperature both a thermochromic effect and a polarization effect not existing before the change of temperature are present as set forth in the claimed combination.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
